

## Security Awareness Training

Digital information is an extremely valuable currency to cyber-criminals. You know this, does everyone else in your organisation?

### Why raise security awareness?

Technology alone cannot safeguard your organisation. Your competitors, other nations, hackers seeking fame and fortune and even disgruntled employees are threats to your information assets. The easiest way for thieves to bypass your technical controls is via your helpful and curious users. All it takes is one click.

### How can Perspective Risk help?

Perspective Risk's Security Awareness Workshop provides your people with the essential skills, insight and knowledge for identifying potential breaches and avoid succumbing to threat.

The workshop's interactive and engaging format covers all aspects of cyber-crime awareness, including:

- What is Social Engineering?
- Handling Corporate Data
- Email and Instant Messaging
- Safe Web Browsing
- Social Media Security
- Phone Based Attacks
- Physical Security

### Benefits

- Reduce the risk of a security breach
- Ensure human compliance with information security policies
- Mitigate social engineering risk
- Measure results and meet compliance targets
- Understand ways you can protect your vital information
- Greater understanding of the many different ways your information can be compromised and how to defend it

### Features

- Taught by an expert security consultant
- Content based on real-world examples
- 2-hour interactive format
- Delivered in-house or at a training centre near your workforce
- Workshops for 10 people for optimum effectiveness
